I bought and played this when it first was released on steam (dev was on oculus thread giving away keys for testing and i didnt get one lol) then waited for some time for updates but yeah , looks like it has been abandoned. it was like 1.99usd from memory at the time.

This is what resident evil would have been like in vr... sort of.

The game plays very much in the way of the original RE (that a good thing if you like the mechanics) and being able to peep behind you (in vr) is great .

The zombies are a bit bland and their movement could use a bit of work.

The game looks promising and im keen to play more.
